1. Service

An automated check of the website **[WEBSITE URL]** against WCAG 2.1 levels A and AA, with a written report. The report is a technical assessment. It does not show that the website conforms to WCAG, EN 301 549 or the European Accessibility Act, and it is not legal advice.

2. What is included

- Automated WCAG 2.1 A and AA scan (axe-core rules, Chromium, desktop view) of up to 10 pages agreed with you, for example home, category, product, cart, search, contact, returns and account sign-in. We confirm the page list by email before work starts. A page that your robots.txt disallows is skipped and named in the report.
- A scripted keyboard pass on the product page: Tab order, visible focus, suspected traps, skip links.
- A report in English as PDF and Word: the five most important problems in plain language (who is affected, how to fix); every problem found with its level, impact, pages and up to three example elements; elements repeated across pages counted once; a short “Fix first” list; a result for each of the 50 WCAG 2.1 A and AA criteria and the checks that still need a person.

3. What is not included

Testing with a screen reader, a hand-run keyboard test, the filled bag, checkout and payment (we never place orders or submit forms), the mobile view, WCAG 2.2, an accessibility statement, a re-check after your fixes, monitoring, and fixing your website.

4. Delivery

The report is delivered by email within 3 business days of your confirmed order. Delivery date: **[DELIVERY DATE]**. Your order is confirmed when you accept this quote in writing, we have confirmed the page list, and the payment has arrived.

5. Price

Item	Price
Automated audit, up to 10 pages (introductory price)	EUR 390.00
Total	EUR 390.00

Prices are in EUR and exclude VAT where applicable. We confirm the price by this quote before work starts.

6. Payment

An invoice follows your acceptance. It is payable in full within **[PAYMENT TERM IN DAYS]** days of the invoice date, and work starts when the payment has arrived. Pay by international bank transfer (SWIFT) in EUR. The payer bears all bank charges, including those of intermediary banks (SWIFT charge option OUR), so that the full amount reaches the beneficiary.
